Contents

Abbott LF, Farhi E, Gutmann S: The path integral for dendritic trees 49
Abbott LF → Kepler TB
Akoev GN → Bedrov Ya
Albrecht V, Paluš M: The spectral dynamics and its applications in EEG 71
Amirikian BR, Lukashin AV: A neural network learns trajectory of motion from the least action principle 261
Anastasio TJ: Simulating vestibular compensation using recurrent back-propagation 389
Angelaki DE, Bush GA, Perachio AA: A model for the characterization of the spatial properties in vestibular neurons 231
Apolloni B, Bertoni A, Campadelli P, Falco D de: Asymmetric Boltzmann machines 61
Arbib MA → Shadmehr R
Ariel M → Balaban CD
Awiszus F: Analytical reconstruction of the neuronal input current from spike train data 537

Balaban CD, Ariel M: A "beat-to-beat" interval generator for optokinetic nystagmus 203
Banzhaf W, Kyuma K: The time-into-intensity-mapping network 115
Bedrov YA, Akoev GN, Dick OE: Partition of the Hodgkin—Huxley type model parameter space into the regions of qualitatively different solutions 413
Berner J, Woody CD: Local adaptations of two naturally occurring neuronal conductances, gk + (A) and gK + (Ca), allow for associative conditioning and contiguity judgements in artificial neural networks 79
Bernstein AS → Neumann EK
Bertoni A → Apolloni B
Blinowska KJ, Malinowski M: Non-linear and linear forecasting of the EEG time series 159
Borisyuk RM, Kirillov AB: Bifurcation analysis of a neural network model 319
Buchanan JT: Neural network simulations of coupled locomotor oscillators in the lamprey spinal cord 367
Budelli R, Torres J, Catsigeras E, Enrich H: Two-neurons network. I. Integrate and fire pacemaker models 95
Burnside JW → Neumann EK
Bush GA → Angelaki DE

Campadelli P → Apolloni B
Catsigeras E → Budelli R
Cherniak C: Local optimization of neuron arbors 503
Chou C-P, Hannaford B: Dual stable point model of muscle activation and deactivation 511
Churikova L → Piotrkiewicz M
Citron MC → Emerson RC
Coiton Y, Gilhodes JC, Velay JL, Roll JP: A neural network model for the intersensory coordination involved in goal-directed movements 167

Dawis SM: Signal transmission through a metabolic cycle follows the compression hypothesis or a weak Weber's law 103
Dean J: A model of leg coordination in the stick insect, *Carausius morosus*. III. Responses to perturbations of normal coordination 335
Dean J: A model of leg coordination in the stick insect, *Carausius morosus*. IV Comparisons of different forms of coordinating mechanisms 345
Dean P, Mayhew JEW, Thacker N, Langdon PM: Saccade control in a simulated robot camera-head system: neural net architectures for efficient learning of inverse kinematics 27
Dick OE → Bedrov YA
Dimitrov GV → Dimitrova NA
Dimitrova NA, Dimitrov GV: Difference in excitability along geometrically inhomogeneous structures and occurrence of "hot spots" 185

Emerson RC, Korenberg MJ, Citron MC: Identification of complex-cell intensive nonlinearities in a cascade model of cat visual cortex 291
Enrich H → Budelli R

Fahle M, Palm G: Perceptual rivalry between illusory and real contours 1
Falco D de → Apolloni B
Farhi E → Abbott LF

Gantert C, Honerkamp J, Timmer J: Analyzing the dynamics of hand tremor time series 479
Ghosh A, Pal NR, Pal SK: Image segmentation using a neural network 151
Gilhodes JC → Coiton Y
Goldfinger MD, Roettger VR, Pearson JC: Theoretical studies of impulse propagation in serotonergic axons 399
Goodwin JM → Rosen BE
Grönfors T, Juhola M, Johansson R: Evaluation of some nonrecursive digital filters for signals of auditory evoked responses 533
Grzywacz NM, Hillmann P, Knight BW: Response transfer functions of *Limulus* ventral photoreceptors: interpretation in terms of transduction mechanisms 429
Grzywacz NM, Hillmann P, Knight BW: The amplitudes of unit events in *Limulus* photoreceptors are modulated from an input that resembles the overall response 437
Gusev V, Semenov L: A model for optimal processing of multisensory information in the system for maintaining body orientation in the human 407
Gutmann S → Abbott LF

Hall JC → Neumann EK
Hannaford B → Chou CP
Happee R: Time optimality in the control of human movements 357
Hassan El-S: Mathematical description of the stimuli to the lateral line system of fish derived from a three-dimensional flow field analysis. I. The cases of moving in open water and of gliding towards a plane surface 443
Hassan El-S: Mathematical description of the stimuli to the lateral line system of fish derived from a three-dimensional flow field analysis. II. The case of gliding alongside or above a plane surface 453
Hillmann P → Grzywacz NM
Honerkamp J → Gantert C
Horikawa Y: Noise effects on spike propagation in the stochastic Hodgkin-Huxley models 19

Johansson R → Grönfors T
Juhola M → Grönfors T

Kepler TB, Abbott LF, Marder E: Reduction of conductance-based neuron models 381
Kersten D → Thompson WB
Kirillov AB → Borisyuk RM
Knecht WR → Thompson WB
Knight BW → Grzywacz NM

Koenderink JJ → Snippe HP
Korenberg MJ → Emerson RC
Kyuma K → Banzhaf W

Langdon PM → Dean P
Leibovic KN, Moreno-Diaz R Jr.: Rod outer segments are designed for optimum photon detection 301
Lukashin AV → Amirikian BR

Macukow B → Mańdziuk J
Malinowski M → Blinowska KJ
Mańdziuk J, Macukow B: A neural network designed to solve the N-Queens Problem 375
Manis PB → White JA
Marder E → Kepler TB
Mayhew JEW → Dean P
McIlhagga W: A model for simple cells as optimal edge detectors 177
Menczer F, Parisi D: Evidence of hyperplanes in the genetic learning of neural networks 283
Miikkulainen R: Trace feature map: a model of episodic associative memory 273
Moreno-Diaz R Jr → Leibovic KN
Mortensen U, Suhl U: An evaluation of sensory noise in the human visual system 37
Mumford D: On the computational architecture of the neocortex. II. The role of cortico-cortical loops 241

Neumann EK, Wheeler DA, Bernstein AS, Burnside JW: Hall JC: Artificial neural network classification of *Drosophila* courtship song mutants 485

Oğuztöreli MN, Stein RB: The effect of variable mechanical impedance on the control of antagonistic muscles 87

Pal NR → Ghosh A
Pal SK → Ghosh A
Palm G → Fahle M
Paluš M → Albrecht V
Parisi D → Menczer F
Paulin MG: Digital filters for firing rate estimation 525
Pearson JC → Goldfinger MD
Perachio AA → Angelaki DE
Person R → Piotrkiewicz M
Piotrkiewicz M, Churikova L, Person R: Excitability of single firing human motoneurones to single and repetitive stimulation (experiment and model) 253
Poon CS: Optimization behavior of brainstem respiratory neurons. A cerebral neural network model 9

Rieger JH: Generic properties of edges and "corners" on smooth greyvalue surfaces 497
Roettger VR → Goldfinger MD
Roll JP → Coiton Y
Rosen BE, Goodwin JM, Vidal JJ: Process control with adaptive range coding 419

Semenov L → Gusev V
Shadmehr R, Arbib MA: A mathematical analysis of the force-stiffness characteristics of muscles in control of a single joint system 463
Siminoff R: Simulated bipolar cells in fovea of human retina. IV. Resolution 123
Siminoff R: Simulated bipolar cells in fovea of human retina. V. Use of Fourier analysis to determine resolution 137
Siminoff R: A simulated human fovea: the *L*-type cells of the magnocellular pathway 191
Snippe HP, Koenderink JJ: Discrimination thresholds for channel-coded systems 543
Stein RB → Oğuztöreli MN
Suhl U → Mortensen U
Swindale NV: A model for the coordinated development of columnar systems in primate striate cortex 217

Thacker N → Dean P
Thompson WB, Kersten D, Knecht WR: Structure-from-motion based on information at surface boundaries 327
Timmer J → Gantert C
Torres J → Budelli R

Velay JL → Coiton Y
Vidal JJ → Rosen BE

Wheeler DA → Neumann EK
White JA, Manis PB, Young ED: The parameter identification problem for the somatic shunt model 307
Woody CD → Berner J

Young ED → White JA

Zohary E: Population coding of visual stimuli by cortical neurons tuned to more than one dimension 265
